SafeMark Specification | 0.75”, 1” | 20, 25mm

SafeMark is a system which consists of ShockPad and our artificial grass – Montana .

The ShockPad is a high-quality underlay with excellent performance that provides safe, comfortable and long-lasting use. With high quality 1.75 inches artificial turf, the system provides an ideal surface for playgrounds, gardens, landscaping, roof/patio gardens and sports fields.

As a safety surface, the GreenPlay system offers a critical fall height of up to 9 feet according to HIC standard – USA ASTM F1292 & ASTM F1951.

The elasticity and shock absorption make it a great safety option for playgrounds offering optimum fall protection and excellent performance.

The ShockPad offers outstanding drainage properties as it will not absorb liquids and is long-lasting.

Product Composition	
Material	100% CROSS LINK foam PE + PU adhesive
Thickness	
Available Thicknesses	0.75”, 1” | 20, 25mm
Sheets	
Sheet Dimensions	40”x60” sheet | 100 x 150 cm sheet
Density	
Product Density	150 Kg/M3 (+/- 10%)
Drainage	
Drainage	1600 liter/hour
